motive Company.

The engines will be placed in road service bringing the total number of this class up to sixty-one. The first mallet engine was built by the Baltimore and Ohio and placed in helper service in 1914, it having been the first of the type built in America. The company also increased its order for steel hopper cars by 2,000 which makes a total of 4,000 freight cars now under order for subsequent delivery. The cost of the engines and cars embraced in the present order is approximately \$3,000,000.

NEW YORK CURB MARKET.

New York, Oct. N.—Trading on the outside securities market today was again active and prices showed further firmness. The specialties continued the center of interest, and the bulk of the day's dealings were centered in these shares. The Cosper shares were again active and for the most part higher, with Braden and Chile Cosper the feature of this department. Both of the last named issues advanced to new high price levels. The market closed firm at near the high point of the session. Bales with closing and bid and asked prices follow: Sales.

NEW YORK MONEY.

New York, Oct. 20.—Money on call was nominally per cent today. For the week the range was 2 and 1% per cent, with the majority of loans made

Time money has continued through the week in an apparently inactive condition, yet a considerable amount in leans has been closed. The amount offered was so large and demand not at all commensurate with it, that leans made did not seem to make any impression on the offerings. There was a good demand, which was more easily seen, for leans on outside securities, one of which was due at agreed upon rates and list of securities before closing. Rates: 25 per cent for sixty days, 3 rev cent for clusty days to four mouths, 54:3% per cent, for six months.

Mercantile paper was generally quiet, as the expected increase in high-class names did not meet expected increase in high-class names did not meet expectations now demands. Short dates could be placed at very low rates. Rates: Sixty to ninety days, 24 per cent; four to six months, la3% per cent; other names, 455 per cent.

CHICAGO GRAIN MARKETS.

Chicago. Oct. 30.—Poreigners have bought enormous quantities of wheat during the last mouth, but they have "burgained" with the sellers to keep all transactions under cover. This shows that importing nations, while requiring immediate and large suppoles of breadstiffs, are anxious to make purchases without the wheat trade of this country becoming aware of the big business passing from day to day. Trose who know the export situation heat are not to be seen on the selling side of wheat, as the recent experience of those who have put out short lines has been most expressive. It is only necessary to som the exports of breadstiffs from week to week to determine as to the amount of wheat now being sold, but as the clearances are from North America with Canada included, it is a difficult matter to separate the shipments to foreign countries from the United Sitates and the country north of us.

Western receipts of wheat last week were enormous and a record of 20,225,000 bushels, compared with 12,531,000 bushels for the corresponding week last year. The shipments last week were large at 0,000,000 bushels, compared with 1,584,000 bushels a year ago.

The Chicago market was % to its lower, and

0.02,000 bushels, compared with 7,34,000 bushels a year ago.

The Colorago market was % to le lower, and the volume of trade was slow today. Cash sales here were smallest at 60,000 bushels, and the bushess in wheat at the seaboard was reported at 730,000 bushels.

Corn finished at losses of % to %c, with the market affected chiefly by the weakness in wheat. Trading was on a very small scale, and price changes were not important. The continued fine weather was a bearish factor and the country offerings were fairly liberal. Burope is interested in our corn and purchased recently 1,100,000 bushels of the new crop to load during December or January. Local cash sales were 65,000 bushels.

Oats weakned with other grains and closed % to %c lower. There was early buring of December oats by export houses, but offerings later became quite free. Under the fine weather the movement of outs from the country has increased, and Western markets last week received a total of 8,43,600 bushels, compared with 7,501,000 bushels a year ago.

Shorts in October ribs were squeezed today and sarsion busines, compared with the course a year ago.

Shorts in October ribs were squeezed today and in their efforts to cover forced the price up 77% cents. October land was also higher, but the balance of the list showed declines. Realizing
